Hessian (H) and Gauss-Newton (G) curvature around grokking, init scale 1, weight decay 1
H top eigenvalue
H effective rank
G top eigenvalue
G effective rank
interquartile band, 10 seeds
median over seeds
grokking onset (first step with test accuracy >= 50%)
training step / that run's onset step (1 = onset)
training step / that run's onset step (1 = onset)
